Sixty Million Jobs After War Promise Of Pres. Roosevelt

CHICAGO — (SNS)—Speaking from this city Saturday night President Roosevelt in search of a fourth term lambasted his Republican opponents and during the course of his remarks stated that if he had anything to do with the peace era, which he hoped would be real soon, there would be 60 million American reproductive jobs after the peace is written. He looked forward to a period of prosperity even after the war, and added that the well being of the world as a whole is synonymous with the well being of each individual family.

The President stated that regardless of race, creed or color these warriors who will soon be returning from the wars can return home in dignity, free from want and from fear. He spoke at length on the economic Bill of Rights, in which is promised a home, clothes to wear, food to eat, medical care, recreation, education, good pay, all which will go to providing new souls of happiness for all American families. He stated that he had on last January presented this bill to the Congress.

In opening the address the President slapped hard at the opposition party in his attacks on him and mentioned laughingly their charges of the Democratic Administration being "tired, old and quarrelsome." He admitted that he had been in many political campaigns, but that this was the most strenuous.

He credited those same old tired, men with having built the world's greatest fighting machine in history, which is winning the way.
